

GRADUATE STRUCTURAL ENGINEER

DRM Consulting Engineers is seeking an enthusiastic Graduate Structural Engineer to join our Structural Engineering team in Edinburgh.

We provide structural design services to residential, industrial and commercial clients across Scotland, with projects ranging from small-scale developments to multi-unit housing and industrial schemes from feasibility through to construction.

The Role:

You will support the delivery of structural designs across a range of materials, including steel, concrete, masonry and timber.

The role offers experience across all project stages, including design development, technical coordination and site involvement.

Key responsibilities include:

- Assisting with structural design calculations
- Supporting the preparation of structural drawings
- Attending design and site meetings
- Carrying out site inspections
- Liaising with clients, contractors and local authorities

About You

- Degree in Civil or Structural Engineering (BEng or MEng)
- Working towards ICE or IStructE membership
- Good communication and teamwork skills
- Interest in building structure design
- Full UK driving licence preferred
- Experience with AutoCAD or structural design software is beneficial but not essential

Please send your CV and covering email to recruitment@davidmurray.co.uk.
